

Influenza A(H1N1) 2009 — Summary of Transmission Dynamics

Panels: incidence, blockwise R_t , smooth R_t , $\beta(t)$ & susceptible fraction

Influenza A(H1N1) 2009 — Daily incidence

Flu 2009 H1N1 — Blockwise R_t : EpiEstim v

Model: smooth $R_t(t)$

Posterior median and 95% CI

EpiEstim: sliding window R_t

$\beta(t)$ — blockwise posterior

Posterior median and 95% CI per block

$S(t)$ — susceptible trajectory
